

# Now Open For Scanning!

## PET/CT

**PET/CT** is an innovative imaging technology that combines PET and CT into one complete scanning system. Anatomical pictures produced by the CT scanner are merged with the molecular or functional images from the PET scanner. PET/CT demonstrates earlier and more accurate detection and staging of a number of diseases.

### What We Offer!

- **PET/CT**
- **CT & CTA**
- **MRI**
- **General & Vascular Ultrasound**
- **Diagnostic Radiography**

Meridian North Imaging Center
